DOM Tapkey

The smartphone is the key

Wireless via cloud (3G / 4G / LTE)

Tapkey App

NFC

Transponder

Tapkey Transponder

THE SMARTPHONE IS THE KEY

DOM and Tapkey offer you the best of both worlds. The wide range of DOM Tapkey digital locking devices enables you to deal with virtually every situation.

We offer a huge range of digital cylinders, digital handles, digital padlocks and digital wall readers to activate an alarm or open a garage door. We believe that everyone and everything of value should be kept secure without any compromise. That's why all DOM products are highly secured by using strong encryptions. Additionally the strong, high-quality mechanical hardware combined with innovative electronic components is
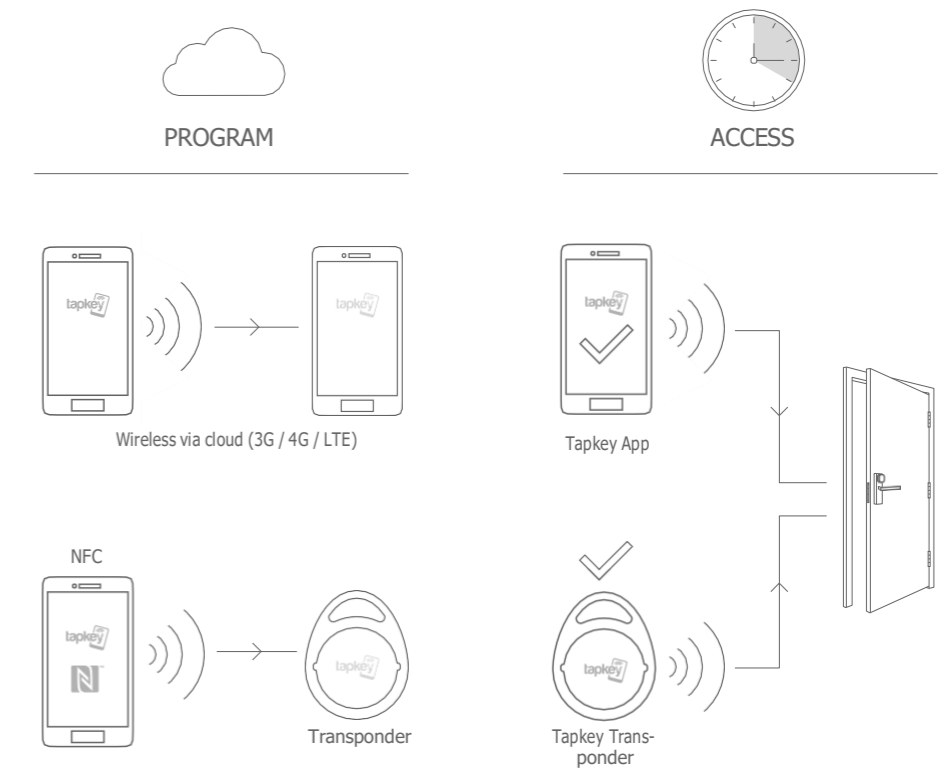

proof of reliability and long life.

Just like the digital devices, the Tapkey app is easy to use. It activates a DOM Tapkey device via the NFC (Near Field Communication) of a smartphone. The admin user can give authorisations to other users, safely and securely, via a highly protected Tapkey ID or Google ID.

THE TAPKEY APP PROVIDES EASY MOBILE ACCESS.
You can create your own digital locking system within minutes. There are three simple steps: download the Tapkey app via Google or the Apple store, activate your account, connect your

locking device for your digital cylinder in the entrance door and garage (for example), and there you go! In just a few steps you can authorise users to open or close a door with a digital device or DOM Tapkey tag.
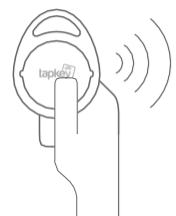

Complete system

- Manage access authorisations via app
- Three smartphone licences per user free of charge: you can mix the licences in your total system - e.g. two user licences at device one and four user licences at device two.
- Open without Internet access
- Additional usage of DOM Tapkey hardware tag
- Use your existing Google ID (no extra registration needed) or Tapkey ID

- Program your tag with your smartphone.
- DOM Tapkey locking devices are stand-alone; no other devices to install near or in the door
- Easy creation of a new Google ID account
- High secure communication by using end-to-end encryption
- Open system: use the app, your smartphone and tag on different locking devices of different manufacturers

- Open platform: use the same smartphone, tag and app to open your home, work place, delivery mailbox, car (car sharing), hotel room, parking space and activate your alarm system

DOM Tapkey

EASY MOBILE ACCESS

DOM Tapkey Transponder

Programmable transponder key

Dom Tapkey Easy Mobile Access is not just an access solution for smartphones with NFC technology. Additionally you can use the Dom Tapkey transponder which is easily fixed on your keychain and needs no battery. An

excellent choice for those people who prefer the more traditional way of access. Needless to say, the admin user programs the DOM Tapkey transponder via its mobile devices within seconds. Tapkey is an open

app platform, so you can use the same app, smartphone and DOM Tapkey tag for other Tapkey applications like opening your carsharing vehicle, parking space, hotel room or delivery mailbox.

NFC

Near Field Communication

Benefits of NFC

- Low use of energy thanks to RFID
- More security through close contact technology
- Fast reading performance
- High encryption standard for best security
- Visibility of access authorisation on the smartphone screen

The use of NFC - Near Field Communication - and the short distance between your locking media and the locking device ensures that nobody can hack your system. The NFC technology with its reliable low battery consumption in combination with the high-quality locking devices of DOM offers you convenient long term use. The DOM Tapkey Easy Mobile Access solution not only allows rights to be

granted quickly but also provides 'offline' use of the rights. The granted access rights continue to exist in the smartphone for seven days without a mobile connection (e.g. E, 3G, 4G or LTE). Access rights can also quickly be revoked by deleting the ID or locking tag of the smartphone user in the Tapkey App. In seconds the smartphone for which the access rights have been revoked receives the new

information over the mobile connection. To be sure, you can transfer the blacklist of blocked tags and IDs directly over your smartphone to the locking device.

Tapkey App

Set time-restricted access rights straight away

TAPKEY FRIENDS & FAMILY
Unlocking is always free. Manage access rights for smartphone users. Manage tags via NFC smartphone. View the last three access login events. Firmware upgrade of locking devices directly via smartphone.

SMART BUSINESS
Same features as friends & family. Full view of access events. More admin users. Licence to use your Tapkey app professionally on other platforms such as Airbnb.

Benefits of the App

- Virtual, smart digital keyring
- Easy secure download
- Use of highly secure Google ID
- Mobile key rights lose their validity after a specified period without updating
- High-level security of your online data with the most modern server located in the EU
- View last three events
- If your device crashes or is stolen, simply deactivate the device or ID on Google or your Tapkey Account
